

SUPPLY CHAIN NETWORK SOLUTIONS

HIGHJUMP 3PL SOLUTIONS

End To End Platform, Purpose-Built For 3PLs

Features

- Built from the ground up exclusively for 3PLs
- Enterprise ready for 3PL
- Enables highest level (in the market) of configurability for end-users
- Lower your total cost of ownership (TCO)
- Improve service
- Increase revenue

ACCELERATING GROWTH AND REDUCING COMPLEXITY

The 3PL industry is a dynamic environment with varying degrees of complexity as a consequence of inventory from multiple clients being received, stored, and shipped from within the same facility. Outsourced logistics companies face challenges in various operational areas such as management of warehouse operations, Workforce, process workflows, business intelligence, data management, enterprise mobility management, revenue assurance management, transportation management. Challenges faced in these areas include; managing capabilities, cost of labor, consistency, critical workflows, concurrency, control, complexity, connectivity and configurability.

Additional challenges faced by outsourced logistics and lead logistics providers include;

- Compliance with service level agreements
- Retain clients and acquire new customers
- Warehouse storage space utilization
- Improve workforce and warehouse equipment utilization
- Order accuracy, fill rate and cycle time

COMPELLING REASONS TO ADOPT OUR SOLUTION AND ADAPT TO YOUR REQUIREMENTS

Built from the ground up exclusively for 3PLs - We understand the unique requirements, risks, and challenges of logistics service providers in this market sector. Growing out-sourced logistics providers trust our enterprise grade solution suite and individual applications to manage their unique scenarios.

Enterprise ready for 3PL - Purpose built for outsourced logistics providers.

Enables highest level (in the market) of configurability for end - users (rules and roles based profile management) providing true multi-tenancy, multi-company, multi-facility, multi-lingual 3PL (no custom coding required, just configure and deploy for each use case).

Lower your total cost of ownership (TCO) - Achieve this with a 3PL lifecycle management solution to manage the entire scope of your operations (including but not limited to-labor management, revenue assurance, risk and compliance management, warehouse and transportation).

Improve service - Automation & mobility, workforce management, client process assurance

Increase revenue - Revenue assurance, Improve your return on investment (ROI).

KEY FEATURES OF THE 3PL WMS

Inbound logistics:

- Appointment Scheduling
- Cross-Docking - Planned and opportunistic (checks to see if product being received has orders against it to avoid double handling by direct cross docking)
- Receiving and Put-away, Optimized receipt and stowage via paper, RF, Voice or RFID
- Inbound Services - Client/Product/Shipper/Receiver specific workflow enforcement, including QA, special requirements (including bonded storage).
- Reverse Logistics / Returns Processing

Work Orders/Special Processing

- Work order and customer request entry, tracking and assignment, raw material management
- Bills of Material, value-added services, kitting
- Pallet and conveyance control system (CHEP etc.)

Inventory Management

- Slotting – Provides optimal warehouse configuration, replenishment
- Cycle Counting Inventory Control
- Special Handling – Configurable workflow by client/shipper/ receiver/product to enforce Standard Operating Procedures.
- Configurable Hold Codes QA and Recall Capabilities Enterprise Visibility
- Business Intelligence – User configurable KPI's with graphical displays with exception based criteria

Outbound

- Task Management and Interleaving Variable Pick
- Packing & Shipping – Cartonization (including on the fly cartonization), QA verification, and staging
- Parcel Manifesting and Billing Integration – parcel labeling and manifesting for couriers/carriers
- Customer Configurable Shipment Documentation Load Building and Transport Billing
- Appointment Scheduling and Dock Door Management Wave Management

What this means for you...

- Monitor and enforce service standards compliance with benchmarks and metrics defined in contracted service level agreements
- Configure role and rules based profile management of workforce scheduling and tasks
- Build scalable and elastic flexibility across the scope of their operations to manage variable (seasonal, cyclical, and others) demand and supply fluctuations
- Generate reports, analytics and business intelligence for strategic and day to day operational insights
- Assure service quality level consistency with excellent customer service support, on time processing, and deliveries of orders
- Support accurate and verifiable billing, revenue, and cost assurance management to internal management and authorized persons
- Provide executives, managers, and supervisory staff with end to end visibility and lifecycle management across operational functions, facilities, user groups, and geographic locations
- Enable true multi tenancy to manage multiplicity of requirements without limitations

ABOUT HIGHJUMP

In almost every industry, buyers are becoming more fickle, and more demanding. For logistics executives, effectively meeting buyer needs has become a relentless quest for speed and agility. Traditional supply chain solutions – siloed, complex and hard-to-implement – no longer suffice, as competitors find ways to deliver goods faster and more profitably.

In this "now" economy, HighJump helps you stay agile, with adaptable, connected solutions that harness the power of your trading partner community. From the warehouse to the storefront, from the desktop to the driver's cab, we can help you achieve new levels of supply chain responsiveness, performance and profitability.

HighJump's suite of warehouse management, business integration, transportation management, and retail/DSD solutions form a complete, powerful and adaptable platform that allow you to drive growth, customer satisfaction and revenue. **HighJump: supply chain accelerated.**
